

INTERNATIONAL
MEETING

SECOND EDITION

BOLOGNA - ITALY

Summer talks in Bologna on Pediatric and Congenital Cardiac Surgery

The big challenge of adult
with congenital heart disease

JUNE
16-17
2023

Dear Colleagues,

In June 2022 we decided to give birth to the **“First Edition of Summer talks in Bologna on Pediatric and Congenital Cardiac Surgery”**, a new international appointment here in Bologna with the aim to create an International conference whose purpose was to give the opportunity to deepen all the aspects of selected topics on congenital cardiac defects from neonates to adult patients. Given the interest and the enthusiastic answer of all our colleagues we decided to go forward with this experience.

In June 2023, with the support of an outstanding Faculty composed of international experts, we would like to deal with the topic of **ACHD patients**, including accurate diagnosis, timing of intervention, selection of the most suitable interventions and risk assessment. A special place will be dedicated to the management of **heart failure**.

We will have the opportunity to share our knowledge, analyze in detail the whole aspect of congenital heart diseases, and a special focus will be developed on **advanced diagnosis, 3D printing, bioinformatics and VAD support**.

The **Second Edition of Summer talks in Bologna on Pediatric and Congenital Cardiac Surgery: The big challenge of adult with congenital heart disease**” will be held in Bologna next year, on June 16th and 17th, 2023.

Session opening comprehensive lectures will be followed by multiple Live in a Box presentations. Through a viewer friendly layout, an appropriate time for discussion and a constant interaction between the participants and the Faculty, our meeting is conceived to be engaging.

We are looking forward to welcoming you for an unforgettable learning experience!

Warmest regards

Dott.ssa Emanuela Angeli

Dott. Andrea Danti

Prof. Gaetano D. Gargiulo

TOPICS

- Clinical approach and diagnostics in adult congenital heart disease
- Frontiers in cardiac surgery in adult congenital heart disease
- Frontiers in transcatheter therapeutics in adult congenital heart disease
- Horizon of ACHD: end stage heart failure, transplantation and mechanical circulatory support
- Hot topics and controversies
